

Point-Of-Sale System

About BCMS

Formed over two decades ago, Banc Certified Merchant Services (BCMS) has grown to handle more than \$220 million a month in processing transactions. BCMS is a leader in the merchant services industry; we enjoy the distinction of being the registered service provider for two of the most respected banks in the world (Bank of America and US Bank). We offer a unique selection of products and services designed with small business owners in mind, including Credit Card Processing, Mobile Processing, Merchant Cash Advances, ACH and Check Services, etc.

At BCMS, our business solutions have three elements for success: a design that meets the needs of small and mid-sized businesses, the speed and highest level of security in electronic communication, and Account Executives dedicated to client satisfaction. These principles have earned us an A+ reliability rating from the Better Business Bureau and respect in the industry.

Create Loyalty Programs

With the BCMS POS System, you can easily capture customer information at the point of sale. View how many days since the customer's last visit, how many times they've visited in the lifetime of your business, and even view the average spend per visit! Create loyalty programs and offer rewards right from the POS software.

Email Receipts

Stay in touch with your customers even after they leave the store! The BCMS POS System allows you to email receipts to your customers with a customized marketing message. You can use your customer email address database to market new inventory, advertise specials, and keep customers informed about upcoming events.

Anywhere, Anytime Access

The BCMS POS System stores all of your information in the cloud. Whether you're at your business, home, or even at the beach, you can always access your POS software. You can always know how your business is doing. All information is kept secure and confidential.

THE BCMS POINT-OF-SALE SYSTEM

The BCMS Point-Of-Sale (POS) system, in partnership with Talech, is state-of-the-art technology designed to help you run your business efficiently. Our POS has a simple and intuitive interface which allows you to take orders, manage your inventory, access customer information, and view daily reports.

Example of the POS interface on the iPad.

With the BCMS POS System, you can monitor the health of your business in real-time. Get reports for daily sales and transactions, average ticket size, top selling products, and more. Additionally, you can apply discounts, add tips, and offer rewards.

The BCMS POS System supports cash and credit card payments. Since the data is encrypted at the time of swipe, your customer information is always secure.

REQUIRED HARDWARE

The BCMS POS System works with the following equipment:

iPad Tablet

The BCMS POS System works with any version of the iPad, including the iPad Mini. It does not currently work with Android tablets, but we are working on those capabilities. BCMS does not supply the iPad.
